Neuronetics Reports Inducement Grant Under Nasdaq Listing Rule 5635(c)(4)

November 18, 2026

MALVERN, Pa., Nov. 18, 2026 (GLOBE NEWSWIRE) -- Neuronetics, Inc. (NASDAQ: STIM), a leader in interventional mental health and provider of NeuroStar® TMS technology and direct patient care through the Greenbrook network of interventional psychiatry clinics, today announced the granting of inducement award(s) to one non-executive employee as described below. In accordance with NASDAQ Listing Rule 5635(c)(4), this award was approved by Neuronetics' Compensation Committee and made as a material inducement to their respective employment with the Company. In all cases, vesting is subject to the recipient's continued service with the Company through the applicable vesting date, and the awards are subject to the terms of the Company's 2020 Inducement Incentive Plan.

Restricted stock units ("RSUs")

Name	Number of Inducement Plan RSUs	Vesting Schedule
Julia Roussel	9,000	1/3 on first anniversary of grant date; 1/3 on second anniversary of grant date; 1/3 on third anniversary of grant date, subject in each case to the recipient's continued employment by the Company through the applicable vesting date.

About Neuronetics
Neuronetics, Inc. is a leader in interventional mental health, combining innovative treatment technologies with direct patient care. Through its NeuroStar® Advanced Therapy system, the company is a leading provider of transcranial magnetic stimulation (TMS) treatment and, through Greenbrook, operates one of the largest interventional psychiatry clinic networks in the United States, offering both TMS and SPRAVATO® therapies. NeuroStar Advanced Therapy is a non-drug, noninvasive treatment that can improve the quality of life for people suffering from neurohealth conditions when traditional medication has not helped. NeuroStar Advanced Therapy is the leading TMS treatment for MDD in adults and is backed by what we believe is the largest clinical data set of any TMS treatment system for depression. Greenbrook treatment centers also offer SPRAVATO® (esketamine) Nasal Spray, a prescription medicine indicated for the treatment of treatment-resistant depression ("TRD") in adults as monotherapy or in conjunction with an oral antidepressant. It is also indicated for depressive symptoms in adults with MDD with acute suicidal ideation or behavior in conjunction with an oral antidepressant.[1]

The NeuroStar Advanced Therapy System is cleared by the U.S. Food and Drug Administration for adults with MDD, as an adjunct for adults with obsessive-compulsive disorder, to decrease anxiety symptoms in adult patients with MDD that may exhibit comorbid anxiety symptoms (anxious depression), and as a first line adjunct for the treatment of MDD in adolescent patients aged 15-21.
